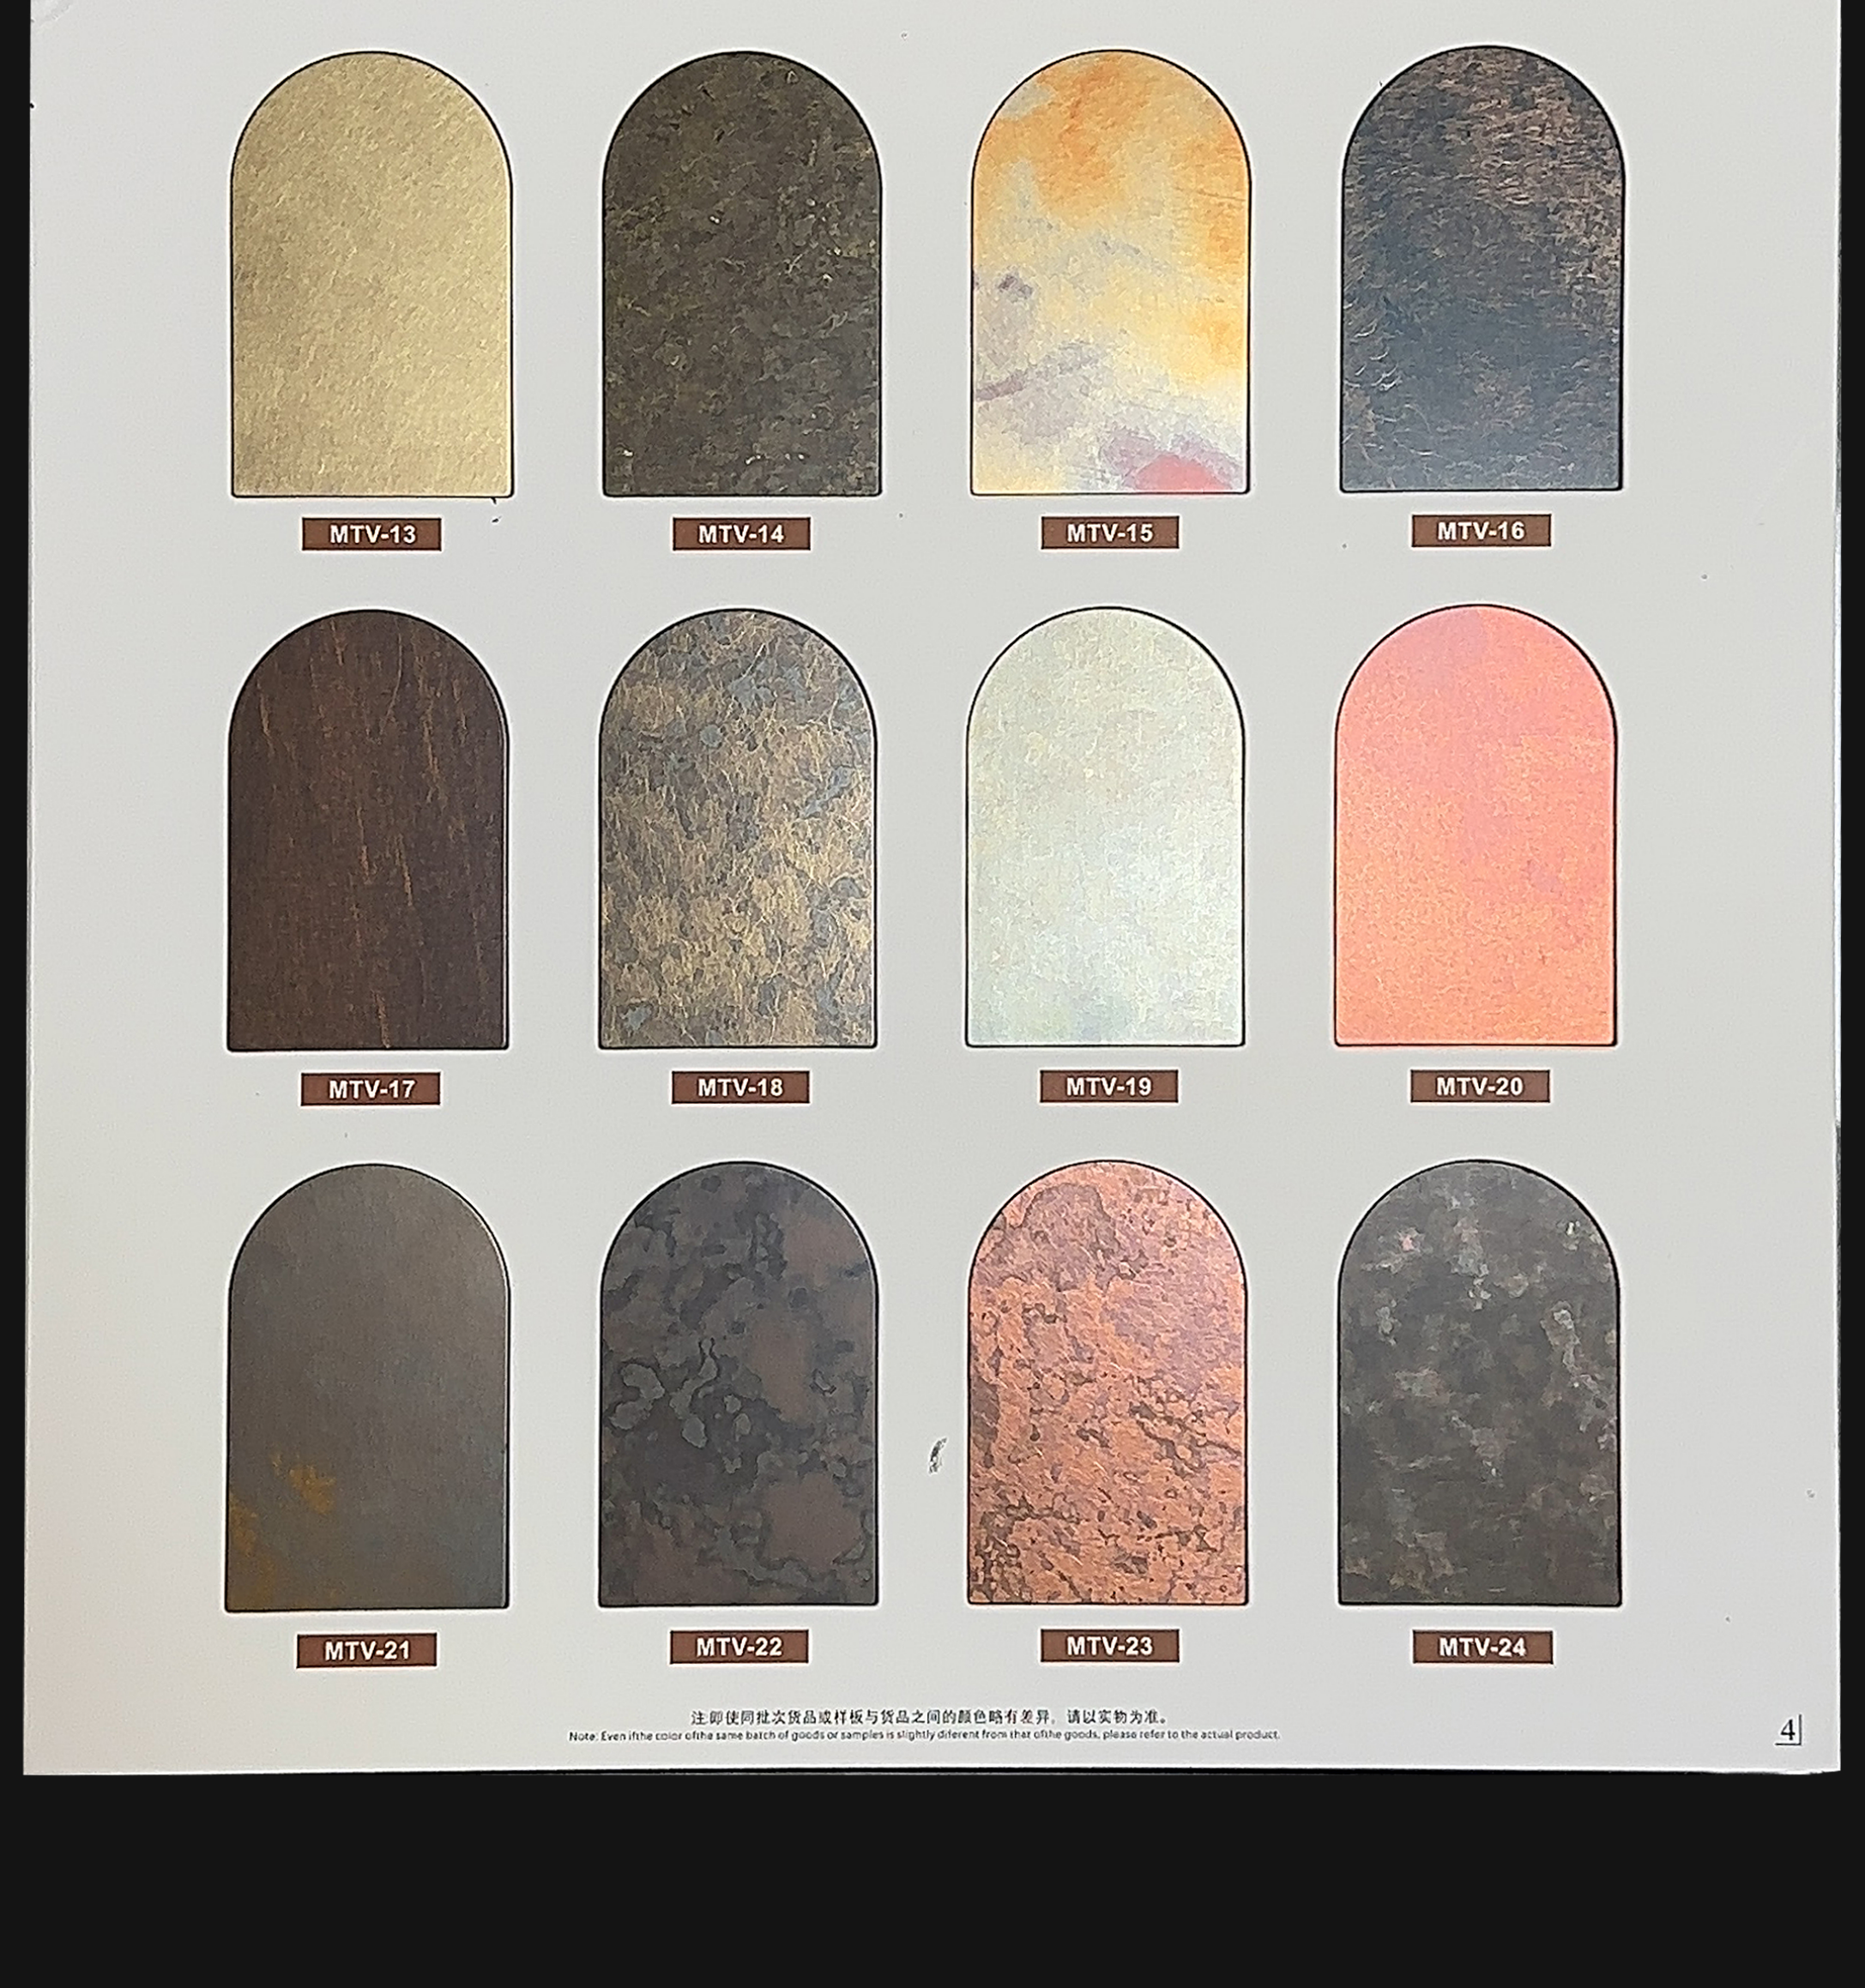
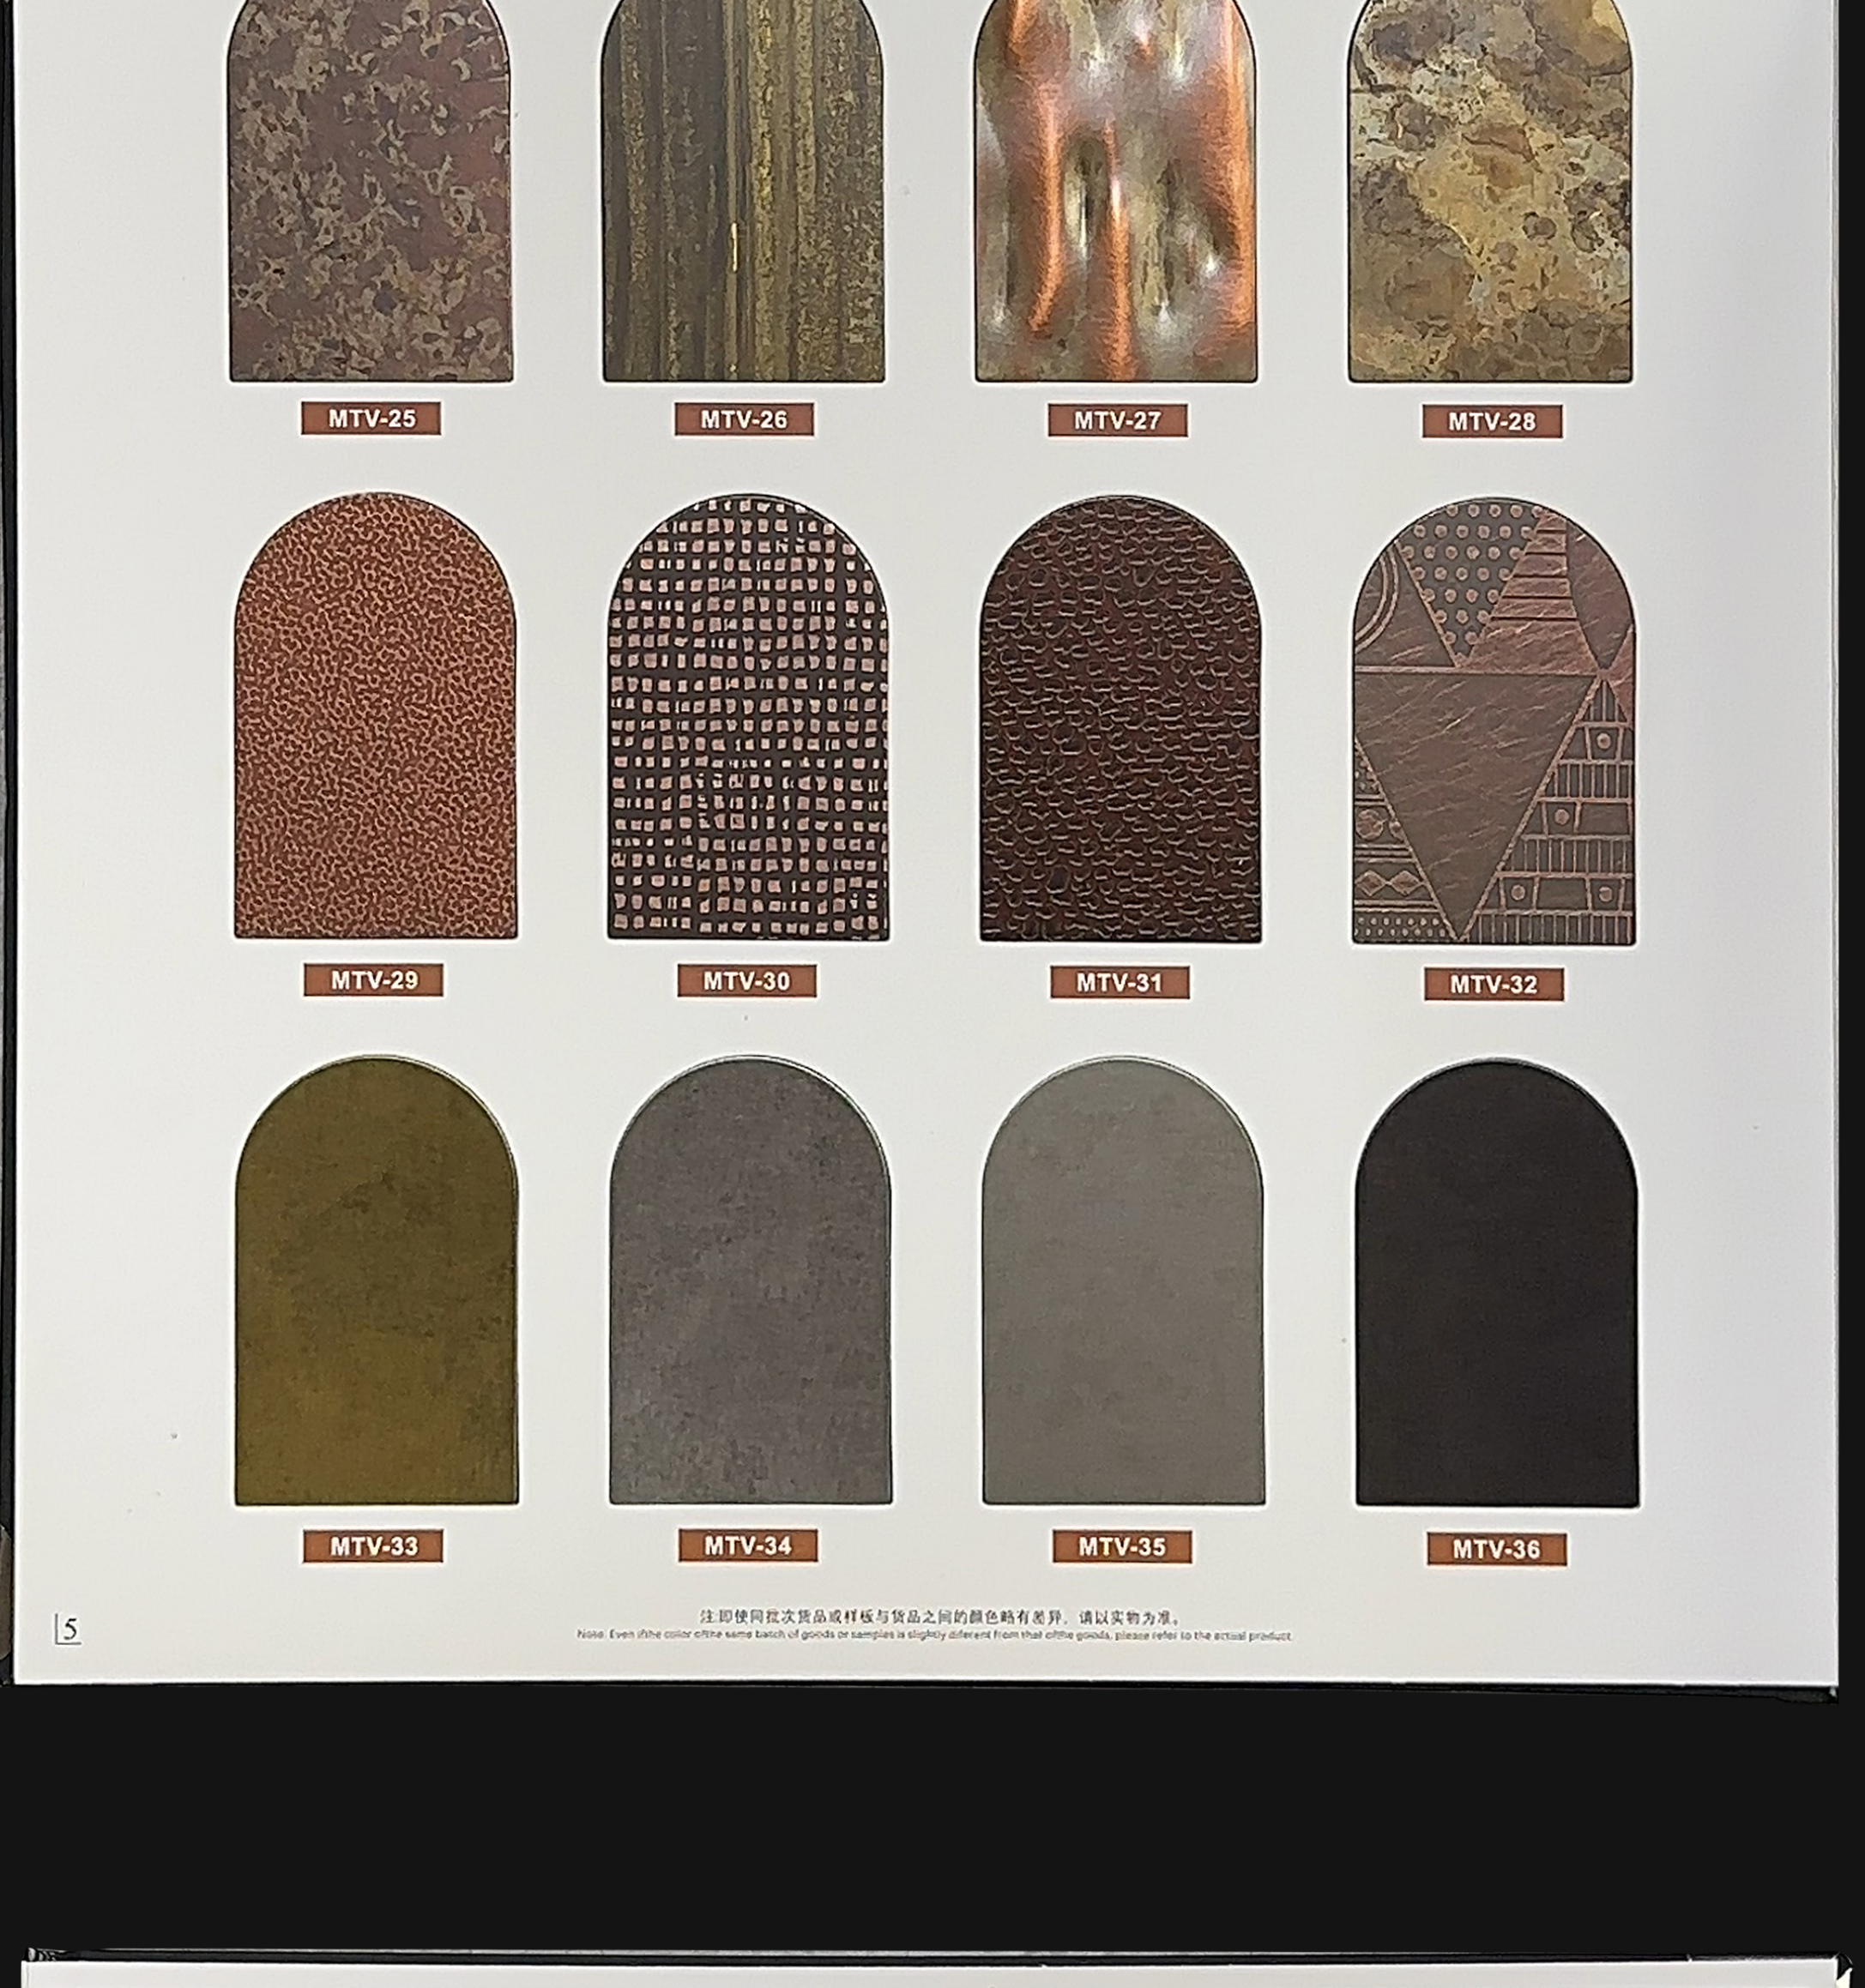
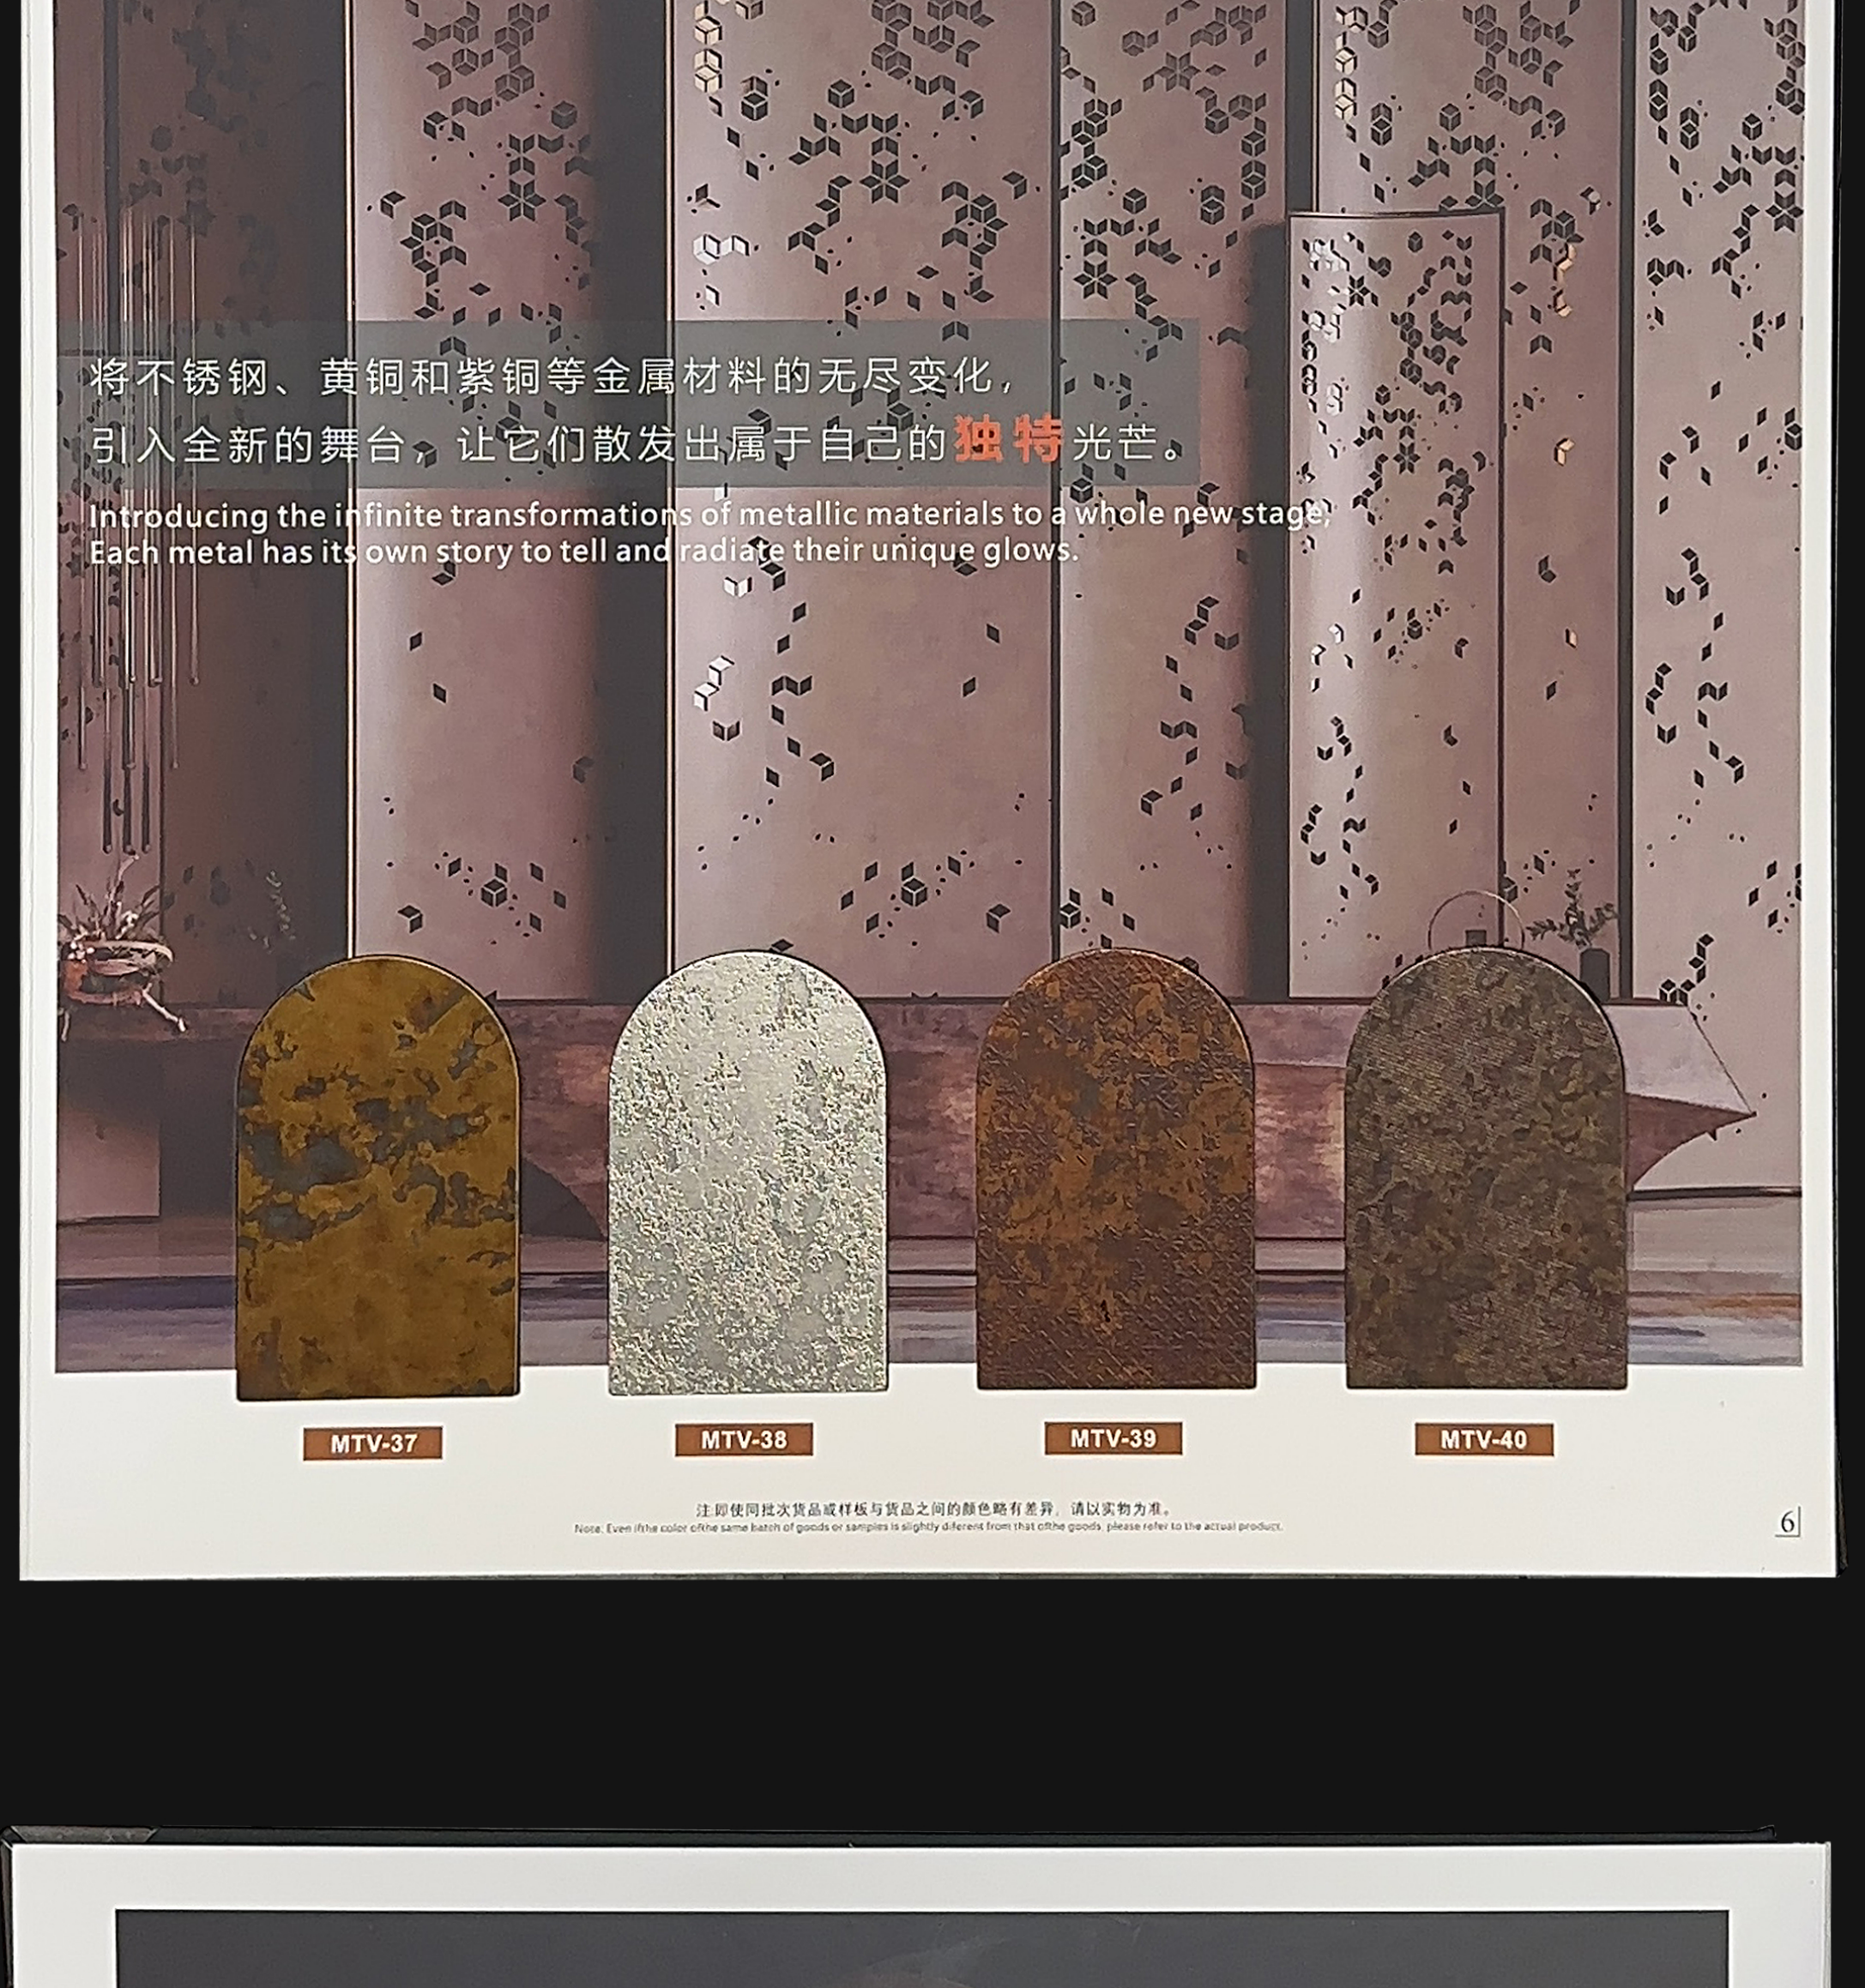
每次不一样的打磨，
皆为**匠心独运之作**。

The manual execution of all finishing operations are testimony to the know-how that finds its identity in experimentation with metal.







将不锈钢、黄铜和紫铜等金属材料的无尽变化引入全新的舞台，让它们散发出属于自己的**独特**光芒。
Introducing the infinite transformations of metallic materials to a whole new stage. Each metal has its own story to tell and radiate their unique glows.

"创意**无处不在**，灵感**永不枯竭**"
Creativity is everywhere, and inspiration never runs out.

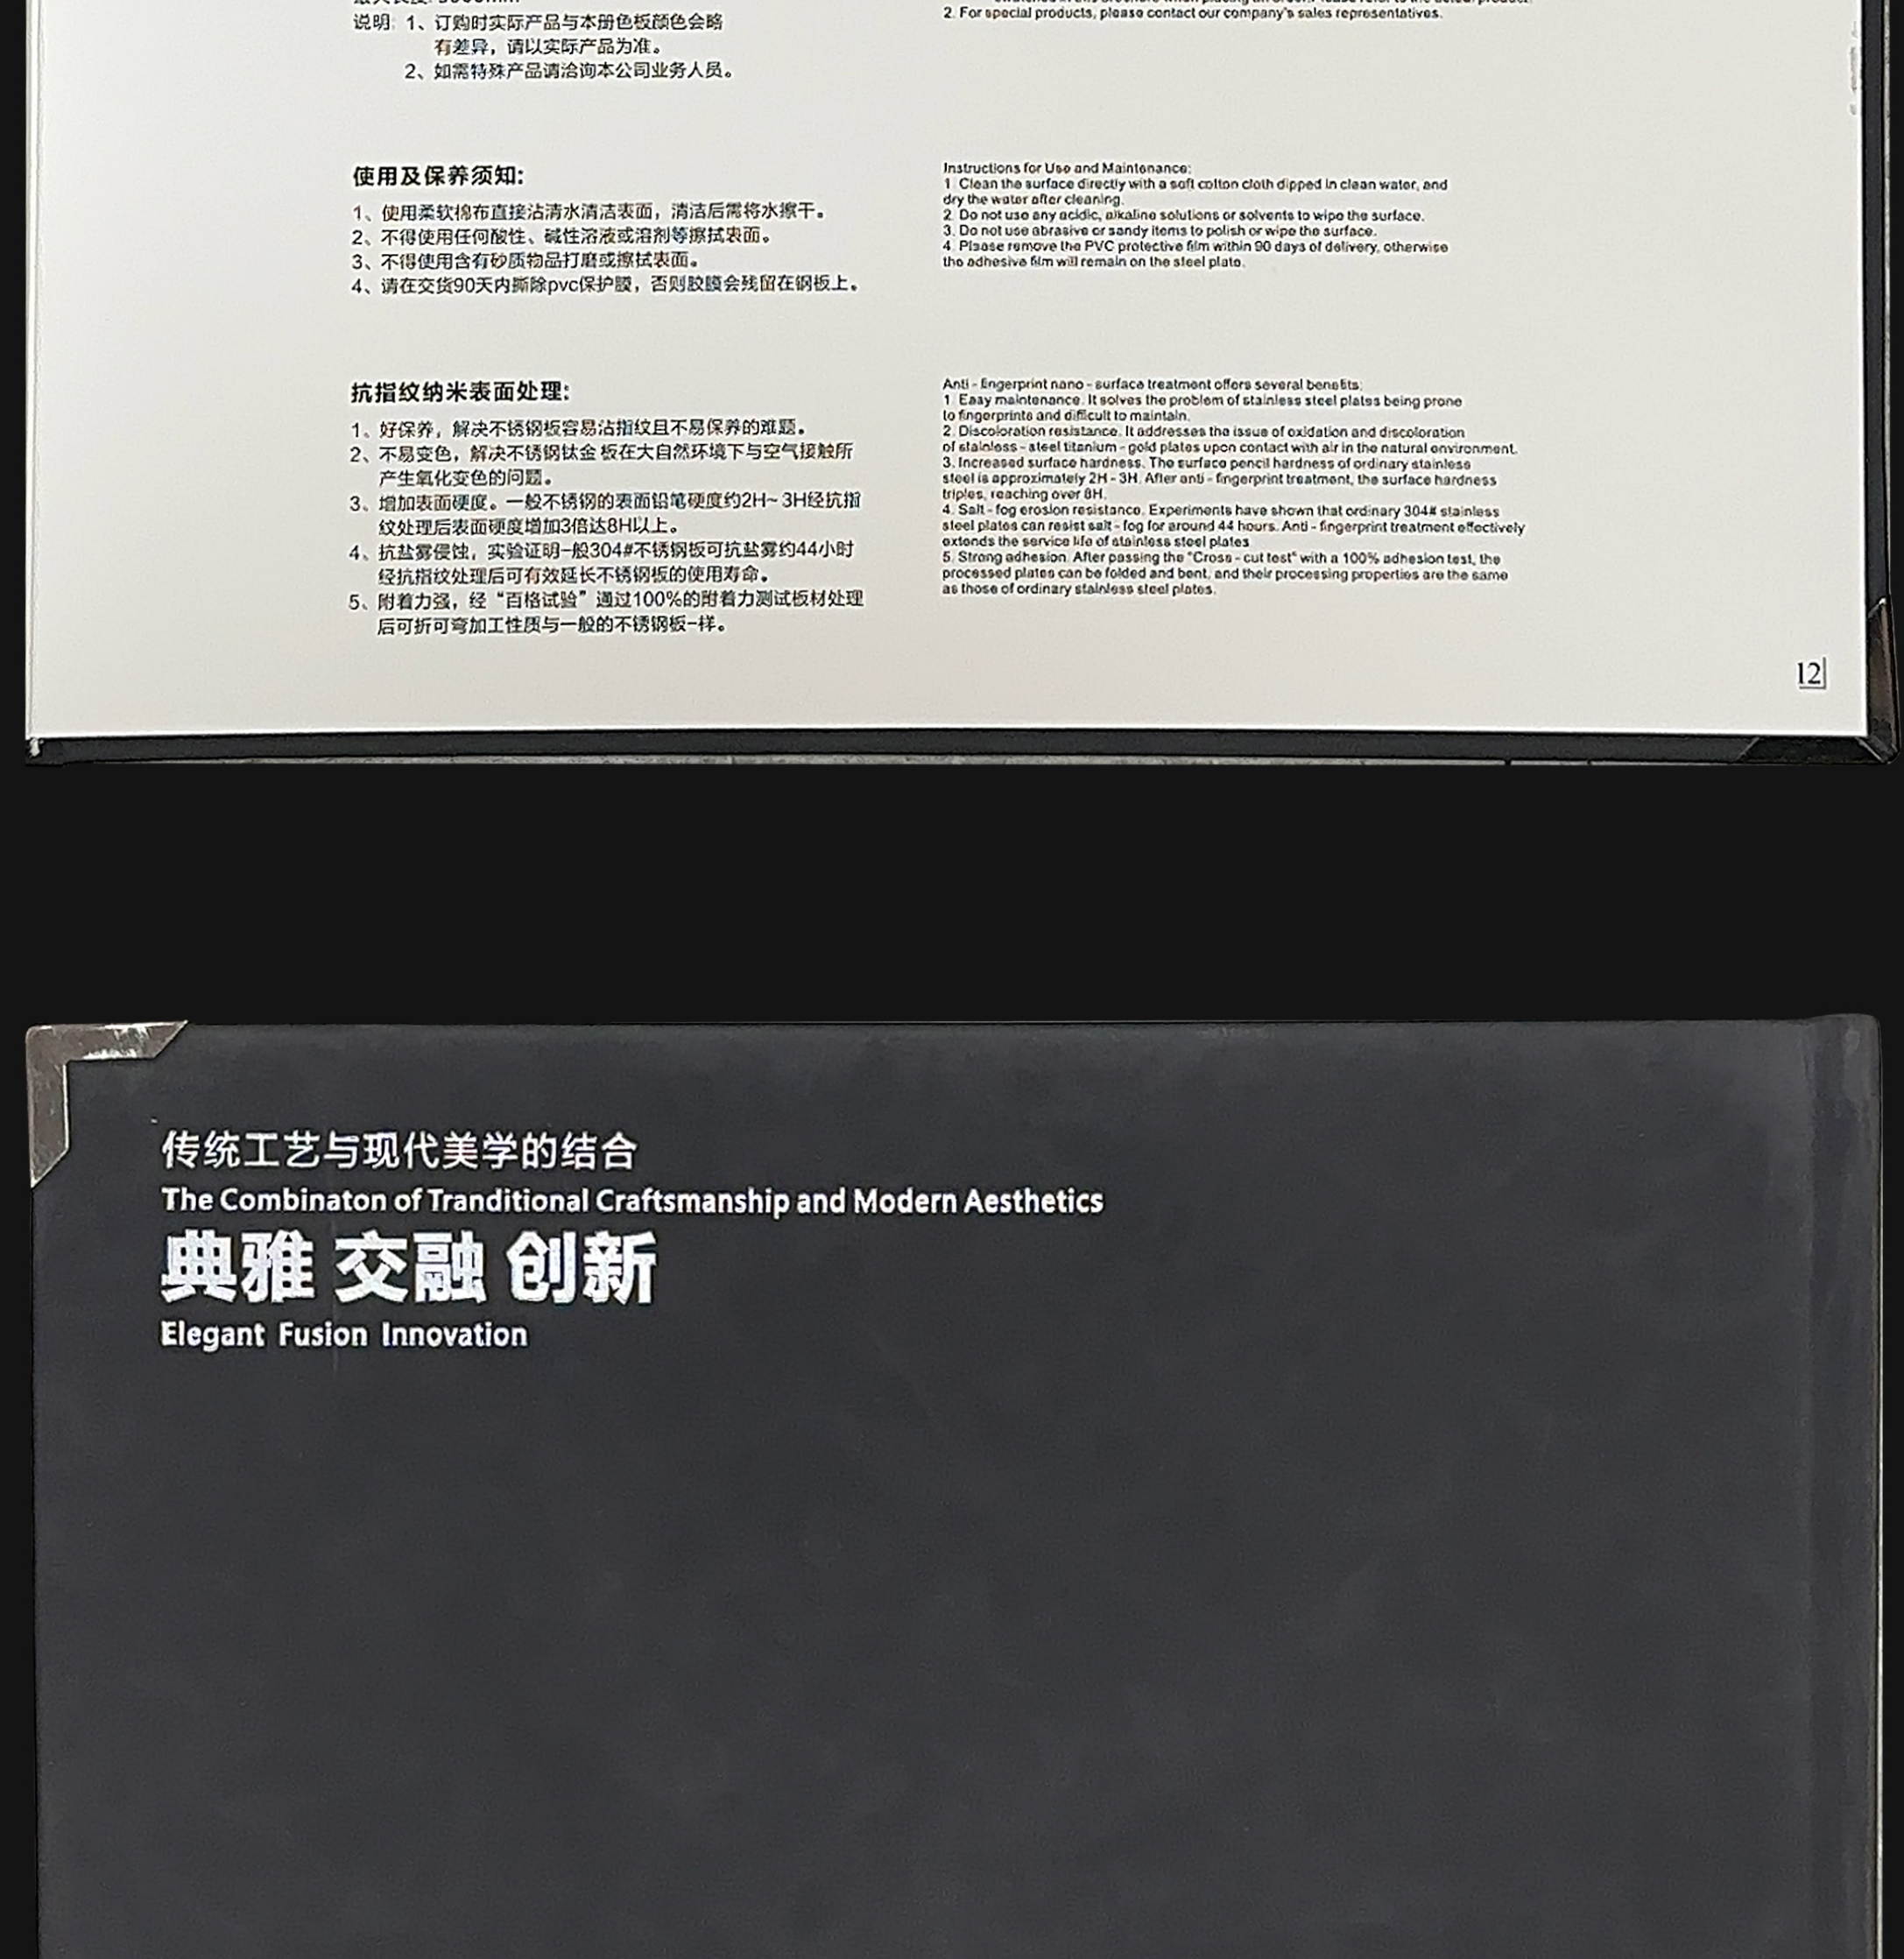
当艺术的灵动与产品的实用相拥，
一场奇妙的**空间变革**与**产品升级**之旅便悄然开启。

This fusion not only enhances the aesthetic appeal of the products but also imbues them with a sense of functionality and purpose, creating an experience that is both pleasing to the senses and practical in daily use. It's a testament to the power of creativity and innovation in designing spaces and products that serve to enrich our lives.



暗面 Shadow Surface　　Size 1220*2440mm/3050mm　　侧光面 Side-lit Surface

生产规格:
材质: SUS430 SUS304 SUS316 SUS201
厚度: 0.5mm~3.0mm
最大宽度: 1500mm
最大长度: 5000mm
说明：1、订购时实际产品与本册色板颜色会略有差异，请以实际产品为准。
2、如需特殊产品请洽询本公司业务人员。

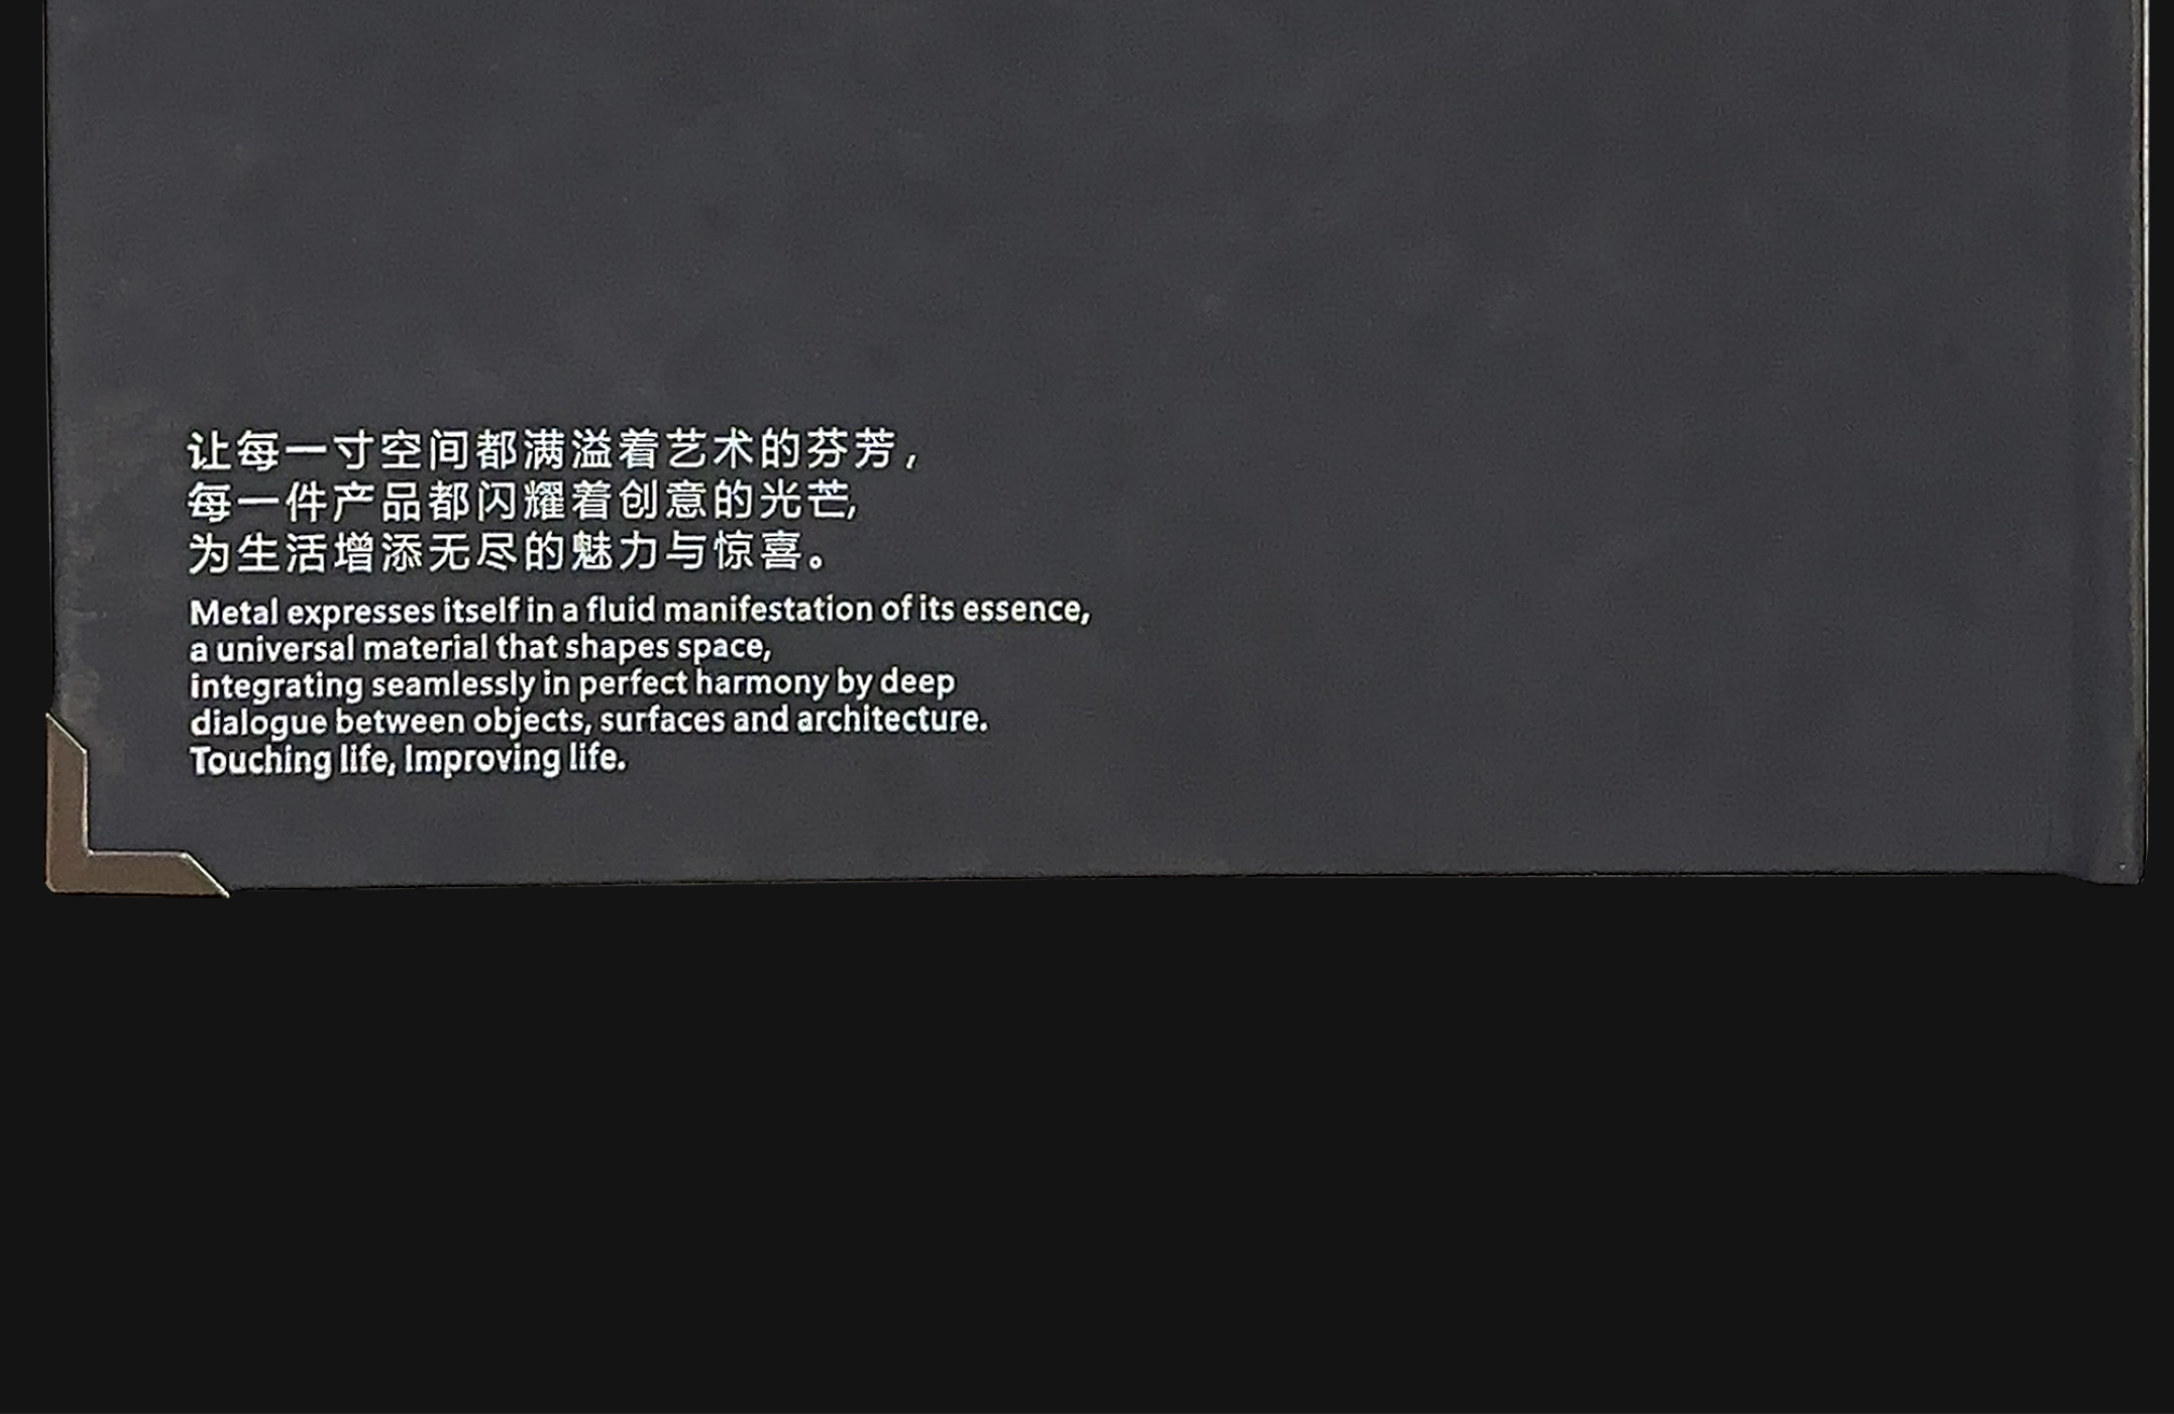
使用及保养须知:
1、使用柔软棉布直接沾清水清洁表面，清洁后需将水擦干。
2、不得使用任何酸性、碱性溶液或溶剂等擦拭表面。
3、不得使用含有砂质物品打磨或擦拭表面。
4、请在交货90天内撕除pvc保护膜，否则胶膜会残留在钢板上。

抗指纹纳米表面处理:
1、好保养，解决不锈钢板容易沾指纹且不易保养的难题。
2、不易变色，解决不锈钢钛金板在大自然环境下与空气接触所产生氧化变色的问题。
3、增加表面硬度，一般不锈钢的表面铅笔硬度约2H~3H经抗指纹处理后表面硬度增加3倍达8H以上。
4、抗盐雾侵蚀，实验证明一般304#不锈钢板可抗盐雾约44小时经抗指纹处理后可有效延长不锈钢板的使用寿命。
5、附着力强，经"百格试验"通过100%的附着力测试板材处理后可折可弯加工性质与一般的不锈钢板一样。

Production Specifications:
Material:SUS430 SUS304 SUS316 SUS201
Thickness: 0.5mm - 3.0mm
Maximum width: 1500mm
Maximum length: 5000mm
Notes: 1. There may be slight differences in color between the actual product and the color swatches in this brochure when placing an order.Please refer to the actual product.
2. For special products, please contact our company's sales representatives.

Instructions for Use and Maintenance:
1. Clean the surface directly with a soft cotton cloth dipped in clean water, and dry the water after cleaning.
2. Do not use any acidic, alkaline solutions or solvents to wipe the surface.
3. Do not use abrasive or sandy items to polish or wipe the surface.
4. Please remove the PVC protective film within 90 days of delivery, otherwise the adhesive film will remain on the steel plate.

Anti - fingerprint nano - surface treatment offers several benefits:
1. Easy maintenance. It solves the problem of stainless steel plates being prone to fingerprints and difficult to maintain.
2. Discoloration resistance. It addresses the issue of oxidation and discoloration of stainless - steel titanium - gold plates upon contact with air in the natural environment.
3. Increased surface hardness. The surface pencil hardness of ordinary stainless steel is approximately 2H - 3H. After anti - fingerprint treatment, the surface hardness triples, reaching over 8H.
4. Salt - fog erosion resistance. Experiments have shown that ordinary 304# stainless steel plates can resist salt - fog for around 44 hours. Anti - fingerprint treatment effectively extends the service life of stainless steel plates.
5. Strong adhesion. After passing the "Cross - cut test" with a 100% adhesion test, the processed plates can be folded and bent, and their processing properties are the same as those of ordinary stainless steel plates.



传统工艺与现代美学的结合
The Combinaton of Tranditional Craftsmanship and Modern Aesthetics

典雅 交融 创新

Elegant Fusion Innovation

让每一寸空间都满溢着艺术的芬芳，
每一件产品都闪耀着创意的光芒
为生活增添无尽的魅力与惊喜。

Metal expresses itself in a fluid manifestation of its essence, a universal material that shapes space, integrating seamlessly in perfect harmony by deep dialogue between objects, surfaces and architecture. Touching life, improving life.
